

scopeArchiv™ 5.0 (TKS) scopeOAIS™ 1.0 (TKS)

→ With *scopeArchiv 5.0 Turn Key Solution (TKS)* and *scopeOAIS 1.0 Turn Key Solution (TKS)* we are offering you two turn-key solutions for professional, traditional archiving as well as OAIS-compliant and ISO 20652 based digital long-term archiving

Turn Key – Our Key to Your Success

→ Still installing your application or already working with it?

Our Turn Key Solution (TKS) offers you professional description in a matter of minutes!

Purchase scopeArchiv and scopeOAIS as a turn-key solution, including hardware and all the installations and configurations required to put scopeArchiv into productive use straight away.

Simple Commissioning and Robust Setup

→ Commissioning couldn't be easier for the customer: Simply plug in the power and network cables, start the system and five minutes later your new archive information system is ready to use.

scopeArchiv 5.0 (TKS) and scopeOAIS 1.0 (TKS) enable you to manage your archive in a professional manner, and with minimum maintenance for your software.

You won't need to waste any time on server maintenance. scopeArchiv 5.0 (TKS) and scopeOAIS 1.0 (TKS) give you the freedom to fully concentrate on your professional tasks.

Main Features scopeArchiv 5.0 (TKS)

- Professional, complete, turn-key AIS solution including hardware and software
- No need for time-consuming installation
- Comprehensive application comprising all the familiar functions and expansion options of scopeArchiv 5.0
- All the required components from the manufacturer are carefully harmonized
- Use, as required, of Windows, Linux, Unix, Macintosh or thin clients thanks to the Remote Desktop Protocol or (as an option) Citrix
- Hardened operating system featuring intrusion detection, an integrated firewall, virus protection and more
- Early detection of system errors thanks to monitoring of over 50 system parameters and automatic reporting in the event of critical deviations (proactive server management)
- Option of reverse remote access by scope for maintenance purposes at the customer's request
- Optionally available as a laptop, desktop or 19" server

Main Features scopeOAIS 1.0 (TKS)

- Comprises all the features of scopeArchiv 5.0 (TKS)

Plus:

- OAIS-compliant, digital long-term archiving thanks to fully installed and configured FEDORA-COMMON based on scopeOAIS 1.0
- Pre-configured scopeIngest server for OAIS-compliant, digital long-term archiving
- Server-side RAID configuration for redundant, secure data management directly on the server
- Integration of different mass storage devices for digital long-term archiving using different protocols (NetFileShares, Windows NetFileShares, iSCSI, SSL, FTP, http, WebDAV, etc.)
- Option of network-based, cross-location, tactical redundancy for increased data security
- Possibility to integrate different storage systems (NAS, Centera, etc.)
